- Multiple Storage Method (Up to 512GB SD Card and Cloud Storage)
- Ultra 265 Video Compression

Double Protection

S3S redefines security with its innovative dual-lens technology, providing advanced protection that typically requires multiple cameras. With a fixed lens and a PT lens working independently or together, it ensures full coverage while reducing costs.

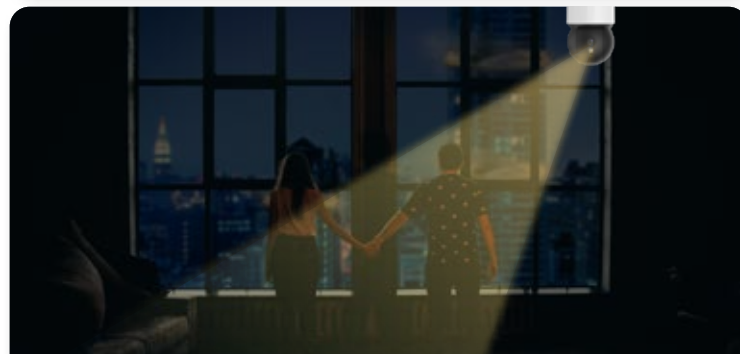

Panoramic View

S3S features a manually adjustable 15° fixed lens and a 355° pan and tilt lens, ensuring complete coverage with no blind spots. This allows you to monitor your shop more effectively, providing peace of mind that every corner is secure.

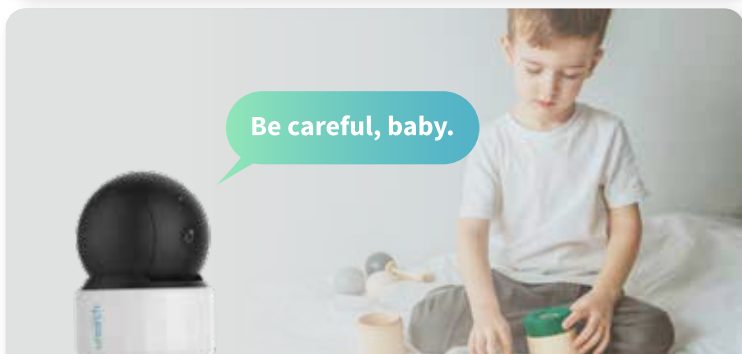

Unimind Detection

S3S is powered by Unimind, which is capable of detecting humans, vehicles, pets, and baby crying. With various detection methods, it makes it easier to sort event types and understand what's going on.

Smart Dual Light

Experience smart dual light with Unimind! When detection is activated, the smart dual light mode captures more colorful details, ensuring enhanced monitoring with minimal light pollution.

Be careful, baby.

Talk Like Face to Face

Built-in mic and speaker enable you to communicate with people on the other side with the best quality sound.

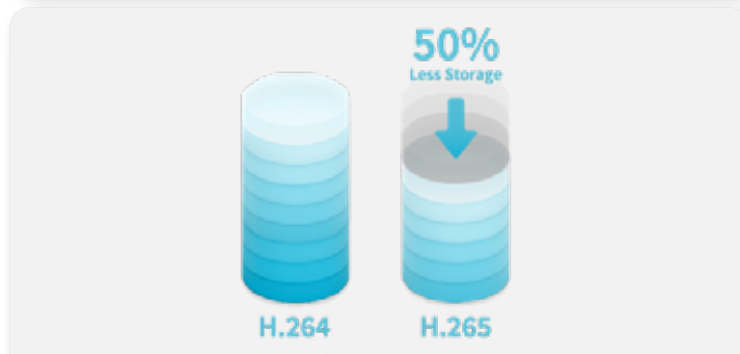

TicOn

S3S offers a seamless setup experience, even in environments with poor connectivity. Enjoy effortless installation and reliable performance, no matter where you are.

512 GB

Multiple Storage Method

Whether stored on a 512GB SD card, NVR, or in the cloud, rest assured that every event is captured without bias, ensuring nothing escapes scrutiny.

50%
Less Storage

H.264   H.265

H265 Video Technology

S3S supports Ultra 265, H.265, and H.264. The latest video compression technology allows you to view higher-quality videos with less space.
